和峻(广州)胶管有限公司
WOJUN (GUANGZHOU)RUBBER CO.,LTD

公司简介 COMPANY PROFILE

和峻(广州)胶管有限公司,位于广州市花都区梯面镇,占地面积10万平方米,总投资近2亿元。

和峻公司是具有较大规模的专业橡胶软管生产企业。公司拥有“WOJUN”、“LIEBAO”等注册商标,公司生产橡胶软管历史近30年,主要生产编织液压软管、缠绕液压软管及各类软管组合件。软管的产品有:钢丝编织液压管、钢丝缠绕液压管、加油机管、氧气乙炔管、油气管等。管体颜色有黑色、蓝色、红色、黄色等,管体外观有光面及布纹。

和峻公司的产品广泛用于工程机械、冶金机械、煤炭机械、矿山机械等的液压及输送系统,遍及石油、化工、建筑、造船、汽车、航空等领域,产品出口量约占了60%,销往世界各地。

和峻公司建立了健全的管理体系,通过了GB/T 19001质量管理体系、GB/T 24001环境管理体系及GB/T 28001职业健康安全管理体系认证,管理体系有效运行。

公司从意大利、韩国等国家先后引进了各类先进、精密、高速生产及检测设备20多台套,包括钢丝缠绕机、钢丝编织机、在线监视和控制壁厚及外径的生产设备;脉冲试验台、爆破试验台等检测设备。

公司始终贯彻“客户至上,诚信经营,持续创新,追求卓越”的企业方针,努力创建世界一流软管品牌。

WOJUN (Guangzhou) Co., Ltd. is located at TiMan town, Huadu District in Guangzhou City. The company covers an area of one hundred thousand square meters. The total investment is nearly 200 million yuan.

WOJUN company which already has 30 years of experience in manufacturing hydraulic hose. It is a big professional hydraulic hose enterprise. Production capacity is about 8 million standard meters and total value 100 million yuan per year. WOJUN listed in QianHai Equity Trading Center at 2015. The stock code is 666982.

WOJUN company is a large-scale professional rubber hose production enterprises. The company has “WOJUN”, “LIEBAO” registered trademark, the company produces rubber hose for nearly 30 years, mainly the production of braided hydraulic hose winding, hydraulic hose and hose assemblies. All kinds of hose products: steel wire braided hydraulic hose, hydraulic pipe winding steel wire, gas pipe, oxygen acetylene tube, oil and gas. The tube body colors are black, blue, red, yellow, tube body appearance is smooth and textured.

Jun and the company's products are widely used in engineering machinery, metallurgical machinery, coal machinery, mining machinery, hydraulic and transport system in the petroleum, chemical, construction, shipbuilding, automobile, aviation and other fields, product exports accounted for about 60%, sold all over the world.

WOJUN the company has established a sound management system, through the ISO 9001 quality management system, environment management system ISO 14001 and OHSAS 28001 occupation health and safety management system certification, the effective operation of the management system.

The company from Italy, South Korea and other countries have introduced all kinds of advanced, precision, high speed production and testing equipment more than and 20 sets, including wire winding machine, wire braiding machine, online monitoring and control of wall thickness and diameter of the production equipment; pulse test bench blasting test and other testing equipment.

Companies always carry out the “customer first, integrity management, continuous innovation, the pursuit of excellence” business policy, and strive to create a world-class brand.

管理体系 MANAGEMENT SYSTEM

质量方针

精心制作，保证产品品质
诚实守信，满足客户需求
持续创新，争当行业先进

质量目标

产品合格率 $\geq 99\%$
顾客满意度 $\geq 85\%$

环境管理 方针

遵守法规，预防污染
节能降耗，持续改进

环境管理 目标

固体废物分类回收率 100%
三废处理达标率 100%

职业健康 安全方针

遵守法律法规，持续提升改进
减少职业伤害，降低安全风险

职业健康 安全目标

重大安全事故年发生率 0
职业病发生人数 0

证书 CERTIFICATES

挤出

SS01	超柔钢丝编织液压软管 SOFT TYPE SINGLE WIRE BRAIDED HYDRAULIC HOSE	超柔钢丝 编织管	34
SS04	超柔钢丝缠绕液压软管 SOFT TYPE STEEL WIRE SPIRAL HYDRAULIC HOSE	超柔钢丝 缠绕管	34

注：有特殊特性的软管，在产品代号后面用代码识别，G 高温、L 低温、H 高压，示例：BF03G，代表高温油气软管。

ES61(EN 856 4SP)

4SP 四层钢丝缠绕中压液压软管

4SP STEEL WIRE SPIRAL MEDIUM PRESSURE HOSE

结构 软管由耐油合成橡胶内胶层,四层交替方向的钢丝缠绕层和耐油耐候合成橡胶外胶层组成。

应用 适用于输送石油基液压油、水基流体、乙二醇水溶液等的液压系统,温度范围为-40°C~+100°C。

CONSTRUCTION

This hose shall consist of an inner tube of oil resistant synthetic rubber, four spiral plies of steel wire wrapped in alternating directions, and an oil and weather resistant synthetic rubber cover.

APPLICATIONS

This section covers hose for use with petroleum base hydraulic fluids within a temperature range of -40°C ~ +100°C.

RS15(SAE 100 R15)

R15 多层钢丝缠绕超高压液压软管

R15 HEAVY DUTY, HIGH IMPULSE, MULTIPLE SPIRAL STEEL WIRE REINFORCED, RUBBER COVERED HYDRAULIC HOSE

结构 软管由耐油合成橡胶内胶层,多层交替方向的粗钢丝缠绕层和耐候合成橡胶外胶层组成。

应用 适用于输送石油基液压油、水基流体、乙二醇水溶液等的液压系统,温度范围为-40°C~+121°C。

CONSTRUCTION

This hose shall consist of an inner tube of oil resistant synthetic rubber, multiple plies of heavy steel wire wrapped in alternating directions, and an oil and weather resistant synthetic rubber cover. A ply or braid of suitable material may be used over or within the inner tube and/or the wire reinforcement to anchor the synthetic rubber to the wire.

APPLICATIONS

This section covers hose for use with petroleum base hydraulic fluids within a temperature range of -40°C ~ +121°C.

HS01(Q/HJJG 02)

钢丝缠绕液压软管

STEEL WIRE SPIRAL HYDRAULIC HOSE

结构 软管由耐油合成橡胶内胶层,四层或六层交替方向的柔软的钢丝缠绕层和耐油耐候合成橡胶外胶层组成。

应用 适用于输送液压流体,如醇、液压油、燃油、润滑油、乳化液、烃等。温度范围为-40°C~+120°C。

CONSTRUCTION

This hose consist of an inner tube of oil synthetic rubber, four or six spirals wire reinforcement and an oil and weather resistant synthetic rubber cover.

APPLICATIONS

Hose range suitable to carry hydraulic fluids such as glycol,mineral oils,fuels,lubrication, emulsion,hydrocarbons etc.Working temperature rangs is within -40°C ~ +100°C .Available in black with either corrugated or smooth finish.

EB71(EN 857 1SC)

1SC 紧凑型一层钢丝编织液压软管

1SC COMPACT TYPE A SINGLE WIRE BRAIDED HYDRAULIC HOSE

结构 软管由耐油合成橡胶内胶层, 一层钢丝编织增强层和耐油耐候合成橡胶外胶层组成, 外观有黑色光面或布纹。

应用 适用于输送石油基液压油、水基流体、乙二醇水溶液及水等的液压系统, 温度范围为 -40°C ~ +100°C。

CONSTRUCTION

This hose shall consist of an inner tube of oil resistant synthetic rubber, a single steel wire braid reinforcement, and an oil and weather resistant synthetic rubber cover.

APPLICATIONS

This section covers hose for use with petroleum base hydraulic fluids within a temperature range of -40°C ~ +100°C.

EB31 (EN853 1SN/1ST、SAE 100R1)

RB16(SAE 100R16)

R16 紧凑型钢丝增强液压软管

R16 COMPACT TYPE WIRE BRAIDED HYDRAULIC HOSE

结构 软管由耐油合成橡胶内胶层, 一层或二层编织的钢丝增强层和耐候合成橡胶外胶层组成。

应用 适用于输送石油基液压油、水基流体、乙二醇水溶液等的液压系统, 温度范围为 -40°C ~ +100°C。

CONSTRUCTION

This hose shall consist of an inner tube of oil resistant synthetic rubber, steel wire reinforcement according to hose design (one or two braids), and an oil and weather resistant synthetic rubber cover. A ply or braid of suitable material may be used over the inner tube and/or over the wire reinforcement to anchor the synthetic rubber to the wire.

APPLICATIONS

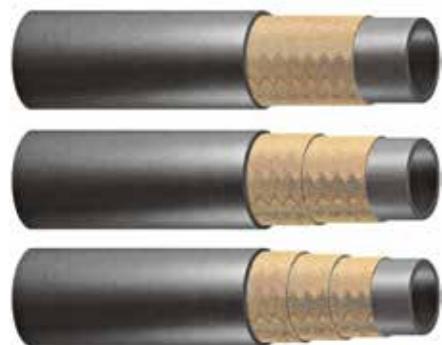

This section covers hose for use with petroleum base hydraulic fluids within a temperature range of -40°C ~ +100°C.

HB02(Q/HJJG 01)

钢丝编织液压软管

STEEL WIRE BRAIDED HYDRAULIC HOSE

结构 软管由耐油的合成胶内胶层、一层至三层的高强度镀铜钢丝编织层和耐候的合成胶外胶层组成。

应用 适用于煤矿液压支架、综合采煤机组等液压系统输送矿物油、水基液压油或水，温度范围为 -40°C ~ +100°C。

CONSTRUCTION

This hose consist of an inner tube of oil resistant synthetic rubber.one or multi-wire braids reinforcement and weather resistant synthetic rubber cover.

APPLICATIONS

For delivery of water, mineral oil or water-based hydraulic oil in the hydraulic system of hydraulic fraines. Combined cool acttings in coal mine.Working temperature rangs is within -40°C ~ +100°C .

钢丝编织蒸汽软管

STEEL WIRE BRAIDED STEAM HOSE

结构 软管由耐油的内胶层、一层钢丝编织的增强层和耐候的外胶层组成。

应用 1型为低压蒸汽软管，最大工作压力0.6MPa，对应温度为164°C；2型为高压蒸汽软管，最大工作压力1.8MPa，对应温度为210°C。适用于输送饱和蒸汽及热冷凝水。

CONSTRUCTION

This hose consist of an inner tube of oil resistant synthetic rubber, one wire braid reinforcement and weather resistant synthetic rubber cover.

APPLICATIONS

For conveying saturated steam and heated condensate water. Type 1 for LOW pressure 0.6Mpa with temperature 164°C. Type 1 for HIGH pressure 1.8Mpa with temperature 210°C.

HB05(HG/T 3037)

加油机软管

REFUEL HOSE

结构 软管由耐燃油的内胶层、一层钢丝编织的增强层和耐候的外胶层组成，外观为黑色光面或布纹。

应用 适用于一般加油机设备输送航空煤油、汽油、柴油以及其他矿物油类，广泛用于机场、油库、码头等。温度范围为-40°C ~ +100°C。

CONSTRUCTION

This hose consist of an inner tube of oil resistant synthetic rubber, one wire braid reinforcement and weather resistant synthetic rubber cover. Available in black with either corrugated or smooth finish.

APPLICATIONS

Widely applied to general refuelling equipment to convey aviation kerosene, gasoline, diesel oil and other mineral oil in airport, oil depot and quay. Working temperature range is within -40°C ~ +100°C.

HB13(DOT3/DOT4)

钢丝编织液动软管

STEEL WIRE BRAIDED HYDRAULIC BRAKING HOSE

结构 软管由耐制动液DOT3/DOT4的内胶层、一层或二层钢丝编织的增强层和耐天候老化的外胶层组成，外观为黑色布纹。

应用 适用于非石油基的液压制动系统，工作温度范围为-40°C ~ +100°C。

CONSTRUCTION

This hose consist of an inner tube of braking liquid DOT3/DOT4 resistant synthetic rubber, one or two wire braids reinforcement, weather and aging resistant fiber or smooth synthetic rubber cover.

APPLICATIONS

For delivery of non-petroleum base hydraulic braking system. Working temperature range is within -40°C ~ +100°C.

型号 TYPE	软管规格 HOSE SIZE			内径 I.D		增强层直径 W.D		外径 O.D		最大工作压力 max W.P

HB07

钢丝编织热水软管

STEEL WIRE BRAIDED HOT WATER HOSE

结构 软管由耐热的内胶层、一层或二层钢丝编织的增强层和耐热耐候的外胶层组成，外观有黑色、蓝色、红色、绿色及黄色光面或布纹。

应用 适用于输送热水。温度范围为 -40°C ~ +150°C。

CONSTRUCTION

This hose consist of an inner tube of heat resistant synthetic rubber, one or two wire braids reinforcement, heat and weather resistant synthetic rubber cover. Available in black, blue, red, green or yellow with either corrugated or smooth finish.

APPLICATIONS

For delivery of hot water. Working temperature range is within -40°C ~ +150°C.

钢丝编织空气软管

STEEL WIRE BRAIDED AIR HOSE

结构 软管由气密性优异的内胶层、一层钢丝编织的增强层和耐候的外胶层组成，外胶层有黑色、蓝色、红色、绿色及黄色光面或布纹，外胶层有刺孔。

应用 适用于压缩空气、水的输送。温度范围为 -40°C ~ +100°C。

CONSTRUCTION

This hose consist of an inner tube of excellent air tightness synthetic rubber, one wire braid reinforcement and weather resistant synthetic rubber cover. Available in black, blue, red, green or yellow with either pin-pricked corrugated or smooth finish.

APPLICATIONS

For delivery of compressed air or water. Working temperature range is within -40°C ~ +100°C.

EB41 (EN 854 1TE,
SAE 100R6)一层织物增强液压软管
FIBER REINFORCED, RUBBER COVERED HYDRAULIC HOSE

结构 软管由耐油和耐水的合成橡胶内胶层, 一层适当的织物增强层和耐油耐候的合成橡胶外胶层组成。

应用 除 HRD R、HFD S 和 HFD T 以外的 ISO6743-4 中规定的 -40°C ~ +100°C 温度范围内的液压流体。

CONSTRUCTION

This hose shall consist of an oil and water resistant synthetic rubber lining, one of suitable textile yarn and an oil and weather resistant synthetic rubber cover.

APPLICATIONS

Hydraulic fluids in accordance with ISO6743-4 with the exception of HRD R, HFD S and HFD T at temperature range of -40°C ~ +100°C .

EB42 (EN 854 2TE,
SAE 100R3)织物增强中压液压软管
DOUBLE FIBER BRAID, RUBBER COVERED HYDRAULIC HOSE

结构 软管由耐油和耐水的合成橡胶内胶层, 二层适当的织物增强层和耐油耐候的合成橡胶外胶层组成。

应用 除 HRD R、HFD S 和 HFD T 以外的 ISO6743-4 中规定的 -40°C ~ +100°C 温度范围内的液压流体。

CONSTRUCTION

This hose shall consist of an oil and water resistant synthetic rubber lining, two of suitable textile yarn and an oil and weather resistant synthetic rubber cover.

APPLICATIONS

Hydraulic fluids in accordance with ISO6743-4 with the exception of HRD R, HFD S and HFD T at temperature range of -40°C ~ +100°C .

RB04(SAE 100R4)

WIRE INSERTED HYDRAULIC SUCTION HOSE

结构 软管由耐油合成橡胶,单层或多层布或编织的纺织纤维与适当的管体钢丝回旋线构成的增强层和耐油耐候合成橡胶外胶层所组成。

应用 适用于低压或负压系统,可以输送石油基液压油、空气、水基流体等的液体介质,温度范围为 -40°C ~ +100°C 。

CONSTRUCTION

This hose shall consist of an inner tube of oil resistant synthetic rubber,a reinforcement consisting of a ply or plies of woven or braided textile fibers with a suitable spiral of body steel wire, and an oil and weather resistant synthetic rubber cover.

APPLICATIONS

This section covers hose for use in low pressure and vacuum applications with petroleum base hydraulic fluids within a temperature range of -40°C ~ +100°C .

油气软管

OIL AND GAS HOSE

结构 软管由耐油的内胶层、一层纤维编织增强层和耐候的外胶层组成，外观为黑色光面或布纹。

应用 适用于输送航空煤油、汽油、柴油、油气混合以及其他矿物油类，温度范围为 -40°C ~ +100°C (G 型为 135°C)。

CONSTRUCTION

This hose shall consist of an inner tube of oil resistant synthetic rubber; one layer of suitable fiber reinforcement; and weather resistant synthetic rubber cover. The cover surface can be produced either smooth or fabric.

APPLICATIONS

This section covers hose for use with conveying jet fuel; gasoline; diesel; mixture of oil and gas and other mineral oil within a temperature range of -40°C ~ +100°C.

氧气软管

OXYGEN DELIVERY HOSE

结构 软管由气密性优异的内胶层、纤维增强层和耐候的外胶层组成，外观为蓝色布纹。

应用 适用于输送工业氧气介质，用于气体焊接和切割的作业，也可输送水、空气等。温度范围为 -20°C ~ +60°C 的软管。

CONSTRUCTION

This hose shall consist of an inner tube with excellent tightness rubber; suitable fiber reinforcement; and weather resistant synthetic rubber cover. The cover surface produced as blue fabric.

APPLICATIONS

This section covers hose for use with conveying oxygen; air; water; for gas welding and cutting purpose within a temperature range of -20°C ~ +60°C.

二氧化碳软管

CARBON DIOXIDE DELIVERY HOSE

结构 软管由气密性优异的内胶层、纤维增强层和耐候的外胶层组成，外观为黑色布纹。

应用 适用于二氧化碳介质，用于气体焊接和切割的作业，也可输送水、空气等，温度范围为 -20°C ~ +60°C。

CONSTRUCTION

This hose shall consist of an inner tube with excellent tightness rubber; suitable fiber reinforcement; and weather resistant synthetic rubber cover. The cover surface produced as black fabric.

APPLICATIONS

This section covers hose for use with conveying carbon dioxide; air; water for gas welding and cutting purpose within a temperature range of -20°C ~ +60°C.

RB2 (GB/T 3683
MT/T 98)二层钢丝编织液压支架软管
RB2 TWO STEEL WIRE BRAIDED HYDRAULIC SUPPORT HOSE

结构 胶管由耐油的内胶层、二层高强度镀铜钢丝编织层和耐候的外胶层组成，外观为黑色布纹。

应用 适用于煤矿液压支架、综合采煤机组等液压系统输送矿物油、水基液压油或水，温度范围为 -40°C ~ +100°C。

CONSTRUCTION

This hose consist of an inner tube of oil synthetic rubber. Wire braids reinforcement and an oil and weather resistant synthetic rubber cover.

APPLICATIONS

For delivery of water,mineral oil or water-based hydraulic oil in the hydraulic system of hydraulic fraines,combined cool acttings in coal mine.Working temperature rangs is within-40°C ~ +100°C .Available in black with either corrugated or smooth finish.

软管使用指南

THE DIRECTION FOR USING HOSE

一、选取软管及软管组合件应当考虑以下方面：

- 工作环境：环境温度，气候条件，和其他物料的外部接触；
- 输送介质：液体，气体，固体，或上述几种介质的混合物；
- 输送方式：加压推送，真空排吸引；
- 工作条件：输送物料的压力和温度；使用频率；脉冲或运动；
- 装配：弯曲的程度；系统的震动；由于撞击和摩擦而导致损坏的危险；正确连接型式的使用。

二、软管组合件具有有限的寿命，降低寿命的因素包括：

- 将软管组合件弯曲到小于最小弯曲半径；
- 扭曲、拉伸、绞结、压轧或磨蚀软管；
- 在最高温度以上或最低温以下使用；
- 软管在超过最大工作压力的脉冲压力下使用（脉冲压力是指压力的迅速和瞬间上升）；
- 管接头质量不符合标准，扣压质量不好；
- 软管总成在使用时，接头拔脱或在距接头 25mm 内出的爆破，都不应视为软管的质量问题，这与接头质量、工装质量有关。外胶龟裂与使用时间、温度、环境有一定的关系，外喷油漆时，因硝基类油漆会加速软管的龟裂，应在整机喷漆时用薄膜等遮盖物对软管进行保护。

三、软管及软管组合件的运输及存放要求：

- 软管的运输、搬运应做到轻拿轻放，不应在锋利和粗糙的表面拖拽，不应使其经受折曲和压扁；
- 软管或软管组合件在贮存，尤其是在长期贮存期间，贮存条件应能对软管或软管组合件提供最佳的保护和最小的损害；
- 软管或软管组合件贮存期应尽可能地短，如果不能避免长期贮存，产品在使用前应进行检查和试验。贮存时，贮存温度应在 0°C 到 35°C 之间，最好在 15°C 左右，相对湿度最好不超过 65%。在贮存期间，温度不应超过 50°C 和低于 -30°C，也不应有反常的波动。应在远离阳光和强的人工光源的暗处贮存，如果贮存内间有窗户或装有玻璃的开口，应使用红、橙或白色遮盖物遮蔽；
- 贮存场地不应有臭氧、热源、产生电磁场的设备。盘卷的软管或软管组合件应平放贮存，堆放的高度应限制在底部的产品不产生永久变形的程度，不推荐将软管卷悬挂在桩钉上；
- 如果软管及软管组合件不可避免的在冰点以下温度中存放或者使用，使用前，必须对软管及软管组合件进行预热。

A. When choosing hose, please pay attention to the following:

- Working Environment: Working temperature, weather, and the connection with other materials;
- Conveyable Matter: Liquid, gases, solid, or the mixture of above matters;
- Convey Ways: Delivery matter under the pressure, delivery and suction under vacuum;
- Working Condition: The pressure and temperature for conveying matter, Use frequency, impulse and movements;
- Installation: Bending, vibration of the system, the risk of damaged caused by hitting and friction, application of the right connecting mode.

B. The is a limited life for hose assembly; please pay attention that the followings would reduce the hose useful life:

- Make the bend radius smaller than the min bend radius.
- Twisting, stretching, weld line, squeeze or corrode the hose.
- To be used exceeded max temperature or lower the min temperature;
- TO be used exceeded the impulse pressure of the max working pressure (the impulse pressure means the rapid rise of pressure).
- The quality of fitting is not up to the standard and assembling is not well.
- Hose assembly is in use, or in the joint pulling away from the blasting joint out within 25mm, should not be regarded as the quality problem of the hose, and the joint quality of tooling quality. The rubber cracking temperature and the use of time, there is a certain relationship between the environment, spray paint, nitro for oil the paint will accelerate the cracking in the hose, painting film covering for the protection of the hose.

C. Transport and storage requirements for hose and hose assemblies:

- Hose transportation, handling should be handled with care, should not drag on the surface of sharp and rough, which should not be subjected to bending and flattening.
- In storage, especially in long-term storage, storage conditions shall provide the best protection and minimal damage to the hose or hose assemblies.
- Hose or hose assemblies should be stored in the storage period as short as possible, if not to avoid long-term storage, the product should be inspected and tested before use. During the storage, the storage temperature should be 0°C to 35°C, preferably at about 15°C, the best relative humidity should not exceed 65%. during storage, the temperature should not exceed 50°C and lower than -30°C, also should not have abnormal fluctuations. Should be stored in the dark from artificial sunlight and strong light source, such as fruit storage inside have a window or an opening with a glass, should use red, orange or white shield covering.
- The storage site should not produce ozone, heat, electromagnetic equipment. Disc hose or hose assembly volume should be placed in storage, stacking height should be limited at the bottom of the product does not produce permanent deformation degree, do not recommend hose hanging on the dowel pin.
- If the hose and hose assemblies are to be stored or used at temperatures below freezing point, it is necessary to preheat the hose and hose assemblies before use.

四、软管的使用要求：

- 充入软管中的压力（包括脉冲力）不得超过规定的最大工作压力；
- 软管不得在规定或建议的温度范围以外的温度（包括所输送物料的温度和环境温度）下使用；
- 软管不得在小于软管生产厂家规定或建议的最小弯曲半径下使用，否则会限制所输送物料的通过，并降低使用寿命。应当避免在软管接头附近弯曲或扭曲，这些部位的弯曲会使软管的增强层疲劳损坏，从而使软管过早的损坏；
- 软管不得在扭曲状态下工作使用；
- 管接头的边棱应光滑，芯子、外套等附件的尺寸必须保证。扣压质量的控制，不足或过大都会使组合件过早损坏；
- 软管具有有限的使用寿命，请定期检查更换。

五、警告：

- 液压软管组合件因使用时间长、损坏、磨损或者扣压、安装不当，存在软管爆破或者接头脱落的危险，其产生的威力，严重的话造成财产损失，甚至人身伤害、死亡，不可忽视。

软管组合件的安装

INSTALLING FLEXIBLE HOSE

软管组合件的长度根据安装情况确定。压力下可能出现的缩短或拉长应根据软管标准的规定来考虑。为保证不因为附加负荷而缩短软管组合件的寿命，组合件的安装通常应满足如下要求：

1. 在安装软管和软管组合件之前，应进行检查以保证软管内壁的清洁和没有堵塞物，管接头不得有外来杂质或毛刺、毛边。表面缺陷，特别是管接头芯子上的表面缺陷有造成外泄露的危险，应当避免。
2. 应避免软管扭转。（见图 1）；
3. 除软管自重外，尽可能降低软管工作状态下承受额外的张力。（见图 2）；
4. 软管不应低于最小弯曲半径进行安装。（见图 3）；
5. 在弯曲安装时，软管弯曲应当在 1.5d (d 为软管直径) 的长度上开始，否则出现铰式支撑。（见图 4）；
6. 采取相应的措施避免软管组合件受外部机械损伤。（见图 5）；
7. 通过使用相应的管头或连接件避免软管出现附加负荷。（见图 6）；
8. 软管组合件在相同的水面出现移动或弯曲，通过合理的安装来避免软管扭转。（见图 7）；
9. 软管组合件使用活动部件时，软管组合件在整个运动范围内不小于最小弯曲半径，不应承受额外的拉力负荷。（见图 8）；
10. 夹持软管时，避免采用妨碍软管自然移动和长度变化的夹式。（见图 9）；
11. 应将由于振动引起的压力降低到最低限度并尽可能的避免。如果软管组合件是连接在刚性部件上，应当采用合适的卡箍并尽量接近连接处；
12. 应当避免软管（例如排气系统附近）受到热辐射，在高温位置可以采用隔热罩或隔热材料将软管保护起来。

D. Requirements for using hose:

- The pressure(including the impulse pressure)filled in the hose must not be exceeded the max working pressure;
- Hose can not be used under the temperature not stipulated or suggested including the conveyable matter's temperature and environment temperature;
- Hose can not be used under the bend radius that is smaller than min bend radius stipulated or suggested,or it will block the matter passing, and reduce the hose useful life. The hose should be prevent from twisting or warping around the connection part,because the bending for this part will damage the reinforcement,as a result,the hose will be damaged quickly;
- The hose can not be used when it is twisted;
- The edge of hose fitting should be smooth;the size of mandril,sleeve or other accessory must be in confirmed.Less or more control of assembling power will also damage the assembly;
- There is a limited life for hose,please check and change it regularly.

E. Warning:

- Hydraulic hose assemblies for use for a long time, damage, wear or buckling, improper installation, or removal of existing blasting hose joint shifting of the dangers of its power, serious word cause property damage, personal injury, or even death, can not be ignored.

The length of hose assembly should be according to the necessity of installation. We should take it in our consideration that the hose would be shorter or longer under the pressure according to the standard regulation. In order not to reduce the useful life caused by the load, the hose assembly installation should meet following requirements:

- Before installing the hose and the hose assembly, you should check the inner, and make sure they are clean and no stem. And there must not be foreign impurity or small thing in the fittings. Surface defects, especially the hose fitting mandrel, would cause a dangerous of leakiness, we should be avoid of using it.
- It should not be twisted (see illustrations 1);
- Except itself weight, reduce the additional tension while the hose is working. (see illustrations 2);
- It is not allowed to install under the bend radius is less than the stipulated minimum bend radius. (see illustrations 3);
- In the installation, the hose length should be at least in 1.5 times diameters of the hose, or it will become hinged bearing. (see illustrations 4);
- Do some relevant measure to avoid the damage caused by external equipment. (see illustrations 5);
- Avoiding addition load to the hose via using suitable fittings or connections. (see illustrations 6);
- When there is movement or bend on one plane on hose, please do some reasonable installation to avoid its twisting. (see illustrations 7);
- When put some active components use in hose assembly, the bend radius can not be less than the min bend radius and can not add addition tension during the whole movement. (see illustrations 8);
- When infibulating hose, can not use the infibulated mode that obstruct the normal movement and change hose length. (see illustrations 9);
- It should reduce the power caused by the vibration to minimum, and it is better to be prevent from it. If the hose assembly is connected to the hard component, it should adopt suitable hoop and fit it near to the connection.
- Be avoiding heat radiation; for example, be not near the exhausting system. The hose can be protected by the thermal-protective coating or adiabatic material.
